

Year group: 1

Time Allocation: 1/2 term

Date: Summer Term 2

Teachers: Miss Hansen and Miss McLean

English:

In English, we will explore a variety of fiction and non-fiction texts and write for different purposes. We will write a recount of a trip to Whitehouse Farm, describing what we did and how it made us feel. We will write postcards from different countries and write fact files on different types of bears. We will learn to recognise and use common prefixes and suffixes as well as different sentence types with the correct punctuation. We will create and write our own 'Bear Hunt' inspired by our finds at Forest School!

Mathematics:

In Mathematics we will start to look at multiplication and division. We will explore the term 'equal' and arrange objects into equal rows and groups. We will start to look at one step word problems and how to solve them using our knowledge of equal groups. We will then learn to group and share equally to explore division using concrete apparatus and pictorial representation.

Science: Animals

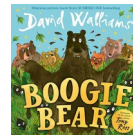

In our science lessons we will be learning to name sort and classify animals into their groups. We will know distinctive features of animals in the bird, fish, reptile, amphibian and mammal group. We will also be looking at the structure of animals and their diet. We will be able to sort and classify animals into omnivores, carnivores and herbivores.

Geography

In our Geography lessons we will be learning to identify, name and locate the four countries and capital cities in the United Kingdom. We will be continuing our work on compass direction and using vocabulary such as North, South, East and West to describe locations in relation to each other and where they are on the map.

Core Books

Ada Twist,
Scientist,
investigates
animals.

WHY?

Children will start to develop an understanding of different groups of animals and how we can classify them.

Core Value:

Respect

S.M.S.C

Children understand that respect means to do to others as you would have do to them.

Religious Education - Creation

In our RE lessons we will continue to explore and discuss Creation. We will consolidate our knowledge of each day of Creation, the things that were made and the order they were made in. We will discuss questions we still have on Creation and endeavour to find the answers.

Computing: We are weather reporters

We will be practicing and filming our own weather reports using iPads. We will be using maps of the United Kingdom to describe the weather in each country. We will use geographical vocabulary and peer review and edit our videos.

Art and Design:

We will be making our own Barnaby Bear slider scene, showing places he has visited in Paris. We will also be making our own Loch Ness monster using a concertina fold to create our Scottish monster between two sticks.

French:

We will begin French this half-term. We will learn numbers to 10 using songs and games to help us. We will learn the colours of the rainbow as well as body parts and simple greeting. Finally, we will celebrate all things French on our very own French day!

PSHE:

In PSHE we will be looking at growing and changing as we think about moving to Year 2. We will be thinking about our bodies and the processes that our internal body parts help us do. We will discuss and explore the differences between now and when children were just a baby.

Physical Education:

In our PE lessons we will be learning how to do a series of gymnastic skills such as travelling on benches, rolling on mats and using larger apparatus. We will be creating our own sequences and performing them to our peers.
